Subject: FW: Student Proposal for Gender Studies Breadth Requirement - Jan 19
Importance: High

Sent on behalf of Dr. Paul Lyons:

The SOM faculty executive committee lauds both the goal and the thoughtfulness of this proposal. The FEC, however, expressed concern regarding the proposal as presented. It was the feeling of the committee that a breadth requirement might not represent a sufficient response to the identified problem. The relationship between the courses and the identified problem was likewise an area of some discussion. Finally the committee expressed a desire for clarification regarding how this new breadth requirement would fit with other breadth requirements: in place of or in addition to. The committee expressed concern regarding what might be displaced, from other breadth requirements or from work within a students major.

Respectfully submitted on behalf of the UCR SoM FEC.

Thank you,
Alaxis "Lexie" Timothy
