RE: Systemwide Review of Proposed Presidential Policy on Open Access for Theses and Dissertations

Dear Shane,

The UCR Division offers the attached responses to the Proposed Presidential Policy. You will see that the primary concern articulated by several consulted committees is in regard to the need for more flexibility with the period of embargo for publishing dissertations/theses, particularly those that contain intellectual property that is pending patent. In addition to this matter, the Committee on Library and Information Technology offered a suggestion that the Policy include a procedure to resolve potential conflicts of interest between the dissertation author and their supervisors regarding embargo. The Committee on Academic Freedom recommended that one particular answer in the FAQ section of the document be clarified and made more precise.

Graduate Council, the Committee on Planning and Budget, and the Executive Committees of the School of Public Policy, Bourns College of Engineering, Graduate School of Education, and the College of Humanities and Social Sciences all support the Proposed Policy without substantive additional comment.

The UCR Division appreciates the opportunity to comment on this matter.

Sincerely yours,

Dylan Rodríguez
Professor of Media & Cultural Studies and Chair of the Riverside Division

RE: Proposed Policy: Proposed Presidential Policy on Open Access for Theses and Dissertations

Date: January 24, 2018

The Executive Committee of the School of Public Policy is supportive of implementing a new policy to ensure open access to UC graduate students’ theses and dissertation in a uniform manner throughout the entire UC system. We strongly support a policy that is consistent with the current policy that both Academic Senate members and non-Academic Senate authors who have written scholarly articles while employed at UC receive.

RE: comments on the “Proposed Presidential Policy on pen Access for Theses and Dissertations”

The School of Medicine Executive Committee discussed the matter at length at the December 2017 FEC meeting.

While most faculty had no problems with the initiative in principle, there was a strong concern that dissertations may contain intellectual property elements that if disclosed prematurely may preclude patenting. The committee therefore recommends that the embargo period would be extended to at least 2 years or longer.

Kind regards,

Maurizio Pellecchia

From: Lisa Raphals, Vice Chair  
Committee on Library and Information Technology

The Committee on Library and Information Technology reviewed the 17-18. Systemwide Review. Proposed Presidential Policy on Open Access for Theses and Dissertations at their January 16, 2018 meeting and offers three comments and suggestions:

- The LIT committee thinks that the default should be open access, but where all students have the ability to embargo (opt out of open access) for up to 5 years, without petition. Members of the committee felt that two years was too little for some fields, and that it was important to protect authors' intellectual property rights.
- In exceptional cases, it should be possible to extend the 5-year embargo period to eight years by petition. (A mechanism would need to be developed to address such petitions.)
- The document at it stands does not address an important potential for conflict of interest: namely when a dissertation author wishes open access and his/her supervisor (also possibly representing the interests of other collaborating grad students) wishes embargo. This situation could arise in cases where open access publication could cause harm to collaborators by revealing their methodologies or strategies prematurely. We were unable to suggest an immediate solution to this problem. But we do point out that it is important and needs to be addressed.

SUBJ: Comment on Open Access for Theses and Dissertations

Members of the Executive Committee of the Graduate School of Education (GSOE) applaud the decision to provide open access to theses and dissertations completed by University of California students. We assume that the Graduate Division at UCR will take charge of supplying further information and directions for creating open access to all graduate students thus affected.

Thank you for the opportunity to comment on this proposal.

    Riverside Division

From: Amit Roy-Chowdhury, Chair
    Committee on Research

The Committee on Research reviewed the Proposed Presidential Policy on Open Access for theses and Dissertations and were in support of the policy with two stipulations. One being that the time delay before a theses or dissertation is published is allowed to be more flexible and at the discretion of the owner to determine the length of the delay. Additionally, the committee wanted to ensure that principal investigators are not responsible for any cost related to the policy.

Committee on Academic Freedom

Re: Proposed Presidential Policy on Open Access for Theses and Dissertations

The Committee on Academic Freedom considered the Proposed Presidential Policy on Open Access for Theses and Dissertations and did not find any academic freedom issues. However, the committee noted that the following answer found in the FAQ section of the material is vague and could present a problem in the future. The committee recommends that the description be changed to a precise and accurate answer.

**Will journal or book publishers consider publishing my thesis/dissertation if it is already available in an open access repository, like eScholarship?**

Yes. Though the policies and practices of publishers vary (especially depending on the discipline), generally speaking, scholarly publishers do not bar publication of articles or books that are based on theses or dissertations available in an open access repository, especially if there are substantive differences between the thesis/dissertation and the final work published by the publisher. This is partly because most publishers consider theses and dissertations to be “student works” that will require substantial editing and revision before being published in article or book form.
