Justification: Some of the lower division requirements in this minor are also requirements for a variety of majors at UCR. Students in these majors interested in declaring the Business Administration minor cannot overlap their major courses with these lower division requirements. They must complete a similar course to satisfy the lower division course requirement. This creates unnecessary burden on these students and does not add new knowledge. Therefore, the Business Administration Program Committee voted in favor of changing them from “Requirements for the minor” to “Prerequisites for the minor.”
