According to the statistics of the Basic Writing Office, a total of 1585 entering students were held for the Subject A requirement.

Of the students held, only 116 students had not fulfilled the Subject A requirement after three quarters. Many of the students who did not pass in spring managed to pass during the summer.

The Fall figures give us a good picture of total Subject A enrollment at UCR. But they do not represent everyone. Despite our efforts, a few Subject A students did not enroll in one of our courses even though they failed the diagnostic and came to UCR. Another seventeen (in the Fall of 2000) took the diagnostic late -- in our November sitting.

It is also important to note that the spring figures do not include the campus total of 32 students who should have taken the exit examination but did not. Some of these students were in the proper classes but did not test; others did not attempt to enroll in the Spring despite our reminders and the reminders of their advisors. It is possible that others withdrew during the Spring Quarter. The overall success rate for UCR freshmen last year continued to be very high.
