The following restrictions and additions apply to college breadth requirements for the Neuroscience major.

For the College of Humanities, Arts, and Social Sciences

[no change]

Humanities Foreign language at level 4 or above for the B.A. may be used to fulfill up to 8 units of the Humanities breadth requirement.

Social Sciences Psychology courses may not be used as part of the Social Sciences breadth requirement if a Biology course is used to meet any part of the Natural Sciences and Mathematics breadth requirement.

Foreign Language In fulfilling the Foreign Language breadth requirement for both the B.A. and B.S. degrees, a modern language such as Spanish, Russian, Chinese, German, or French must be used.

Natural Sciences and Mathematics The Neuroscience Core in the Neuroscience major satisfies the Natural Sciences and Mathematics breadth requirement.

For the College of Natural and Agricultural Sciences

[no change]

Humanities For the B.S. degree, 16 units instead of 12 units are required to fulfill the Humanities breadth requirement. PHIL 134 and PHIL 137 are recommended.

Social Sciences For the B.S. degree, 16 units instead of 12 units are required to fulfill the Social Sciences breadth requirement. Psychology courses not required or approved for the Neuroscience major may be used in meeting the Social Sciences breadth requirement.

Foreign Language In fulfilling the Foreign Language breadth requirement for the B.A. degree, a modern language such as Spanish, Russian, Chinese, German, or French must be used. Further, fourth-quarter level proficiency in one foreign language (not level 2 in two languages) is required.

Natural Sciences and Mathematics The Neuroscience Core in the Neuroscience major satisfies the Natural Sciences and Mathematics breadth requirement.

Justification:

The upper-division unit requirements for the major have been adjusted to 44, reduced from 52 per the UD-45 reduction project.

The course content of BIOL 002 is not recommended for science majors, and has no prerequisites (e.g. Chemistry). Hence, the rigor and expectations for the lecture and laboratory portions of BIOL 002 are not as high as for BIOL 20, which is for life science majors. In BIOL 20, students perform Polymerase Chain Reaction (PCR), do bioinformatics analysis, and open-ended experiments in genomics research. BIOL 20 is 6 hours/week, whereas BIOL 002 lab is 3 hours/week. Hence, the content, detail and expectations are much lower for BIOL 002. Finally, BIOL 002 includes the laboratory and lecture together in one course, whereas BIOL 20 is a standalone laboratory course that can substitute for BIOL 05LA for credit in BIOL 005A. The inclusion of the laboratory component in BIOL 002 allows some students who do not pass the laboratory portion to pass the entire course. This is not possible with BIOL 20 as a separate course from the lecture/discussion course BIOL 005A.

The Department of Chemistry has moved forward to separate Organic Chemistry courses into two courses (LEC and LAB) per the Undergraduate Studies Committee's recommendation for 2017 FALL. Also, re-numbering the courses to "008" for the Organic Chemistry Lecture Series (CHEM 008A, CHEM 008B, CHEM 008C,) and "08" for the Honors Organic Chemistry Lecture (CHEM 08HA, CHEM 08HB, CHEM 08HC) and Organic Chemistry Labs (CHEM 08LA, CHEM 08LB, CHEM 08LC, CHEM 08HA,

CHEM 08HB, CHEM 08HC, CHEM 08HLA, CHEM 08HLB, CHEM 08HLC) in order to comply with BANNERS system requirements.

The purpose of the new course is to present calculus in the context of biological sciences. The Mathematics Department created a new track of first-year calculus that runs parallel to Math 9A and 9B and has the same placement criteria as well as prerequisites. MATH007A/B will be considered equivalent in terms of program requirements, and in the progression of the first-year calculus sequence. The content of Math 007A/B significantly overlaps with Math 009AB so that credit is only awarded for either Math 007A or Math 009A.
